

**Information from 30.04.2021 on the result of the conducted
procedure no. LI-21.02-01**

**for the order of the implementation of eNB software maintenance and
development services**

We kindly inform that the procedure of the selection of a contractor for the delivery of eNB software maintenance and development services under the project entitled "*Innovative LTE - Advanced 450MHz microcell for critical communication systems*", conducted under the public announcement on 08/04/2021 has been completed.

The procedure has not been resolved positively due to the lack of submitted offers.
